DETAILED ACTION

1. The amendment A filed 8/09/04 has been entered. Claims 4-28 have been cancelled. Claims 1-3, 29-39 are pending in this Office action.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1 and 31 are rejected under 35 U.S.C. 102(b) as being anticipated by Adams et al (U.S. Pat. 5,786,778).

Regarding claim 1, Adams et al disclose a communication system as shown in Figure 13, comprising: an all-digital loop circuit (a PLL includes a noise-shape DCO 72, a loop filter 130, a phase detector 76, a divide-by-128 element 80); for outputting a sample rate control signal (a sample rate control signal output from the noise-shape DCO 72) to be function of a frequency of a reference signal received by the communication circuit; a variable-ratio sample rate filter (a decimation filter 132) that changes a sample rate of an output digital data stream relative to a sample rate of an input digital stream in response to the sample rate control signal received from the all-digital loop circuit (col. 12, lines 3-30 i.e. the decimation filter 132 operates at the

variable rate of the noise shaped clock signal according to the sample rate control signal received from the noise-shaped DCO 72).

Regarding claim 31, Adams et al disclose the variable-ratio sample rate filter comprising: an interpolation filter (84).

Allowable Subject Matter

4. Claims 2-3, 29-30 and 32-37 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. The following is a statement of reasons for the indication of allowable subject matter: Adams et al fail to disclose or suggest that the communication system comprising: an analog-to-digital converter, coupled to the variable sample rate filter, and fixed clock coupled to the analog-to-digital converter to substantially fix a sampling rate of the analog-to-digital converter.

Response to Arguments

6. Applicant's arguments with respect to claims 1-3 (original claims 4-28 have been cancelled), and newly added claims 29-39 have been considered but are moot in view of the new ground(s) of rejection.

The new ground of rejection has been made and illustrated as above (see paragraph 2).

Conclusion

Art Unit: 2637

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
